VICTORINOX FLAGSHIP STORE

New Bond Street London 2008
Designed for RetailPartners AG

Victorinox, famous for the iconic Swiss Army Knife are launching a major Flagship store in London's West End. The shop will primarily sell the apparel range, along with watches, travel gear, cooking knives, perfume and naturally the famous knives and multi tools. The shop includes special touch points where the products point of difference are celebrated. The central feature of the store is a huge glass case of Swiss Army knives, 10m high running through the stairwell.

PILATUS

Stand for the launch of Pilatus PC 24
 Design for EBACE, Geneva
 Designed for Andreas Messerli AG.

Pilatus Aircraft launched their first ever jet aircraft at EBACE 2012. The creation of the stand was inspired by a visit to the Pilatus factory close in Stans. The laminate elements of the new assembly building were used as a visual reference in the stand design. A dramatic canopy in the form of a wave framed the aircraft on the stand, giving the aircraft the sense of being rolled out of a hanger and into the world.

ESTABLISHED & SONS

Milan Furniture Fair 2010
 Designed for Andreas Messerli AG.
 Designed with with Seb Wrong and
 Alasdhair Willis

Established & Sons 2010 Installation
 was inspired by the idea of creating a
 terrace of long plinths onto which sit
 the products. This made reference to
 the idea of a production line belt
 producing very different items of furni-
 ture. The complete collection of furni-
 ture could easily be seen in a single
 panorama so it worked as a clear index
 to Established & Sons work

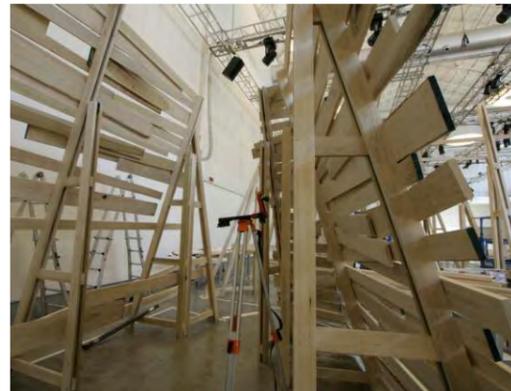

James Dudley
 Swiss +41 79 751 89 50
www.jamesdudley.co.uk
jim.dudley@gmail.com

ESTABLISHED & SONS

Milan Furniture Fair 2009
Designed for Andreas Messerli AG.
Designed with Seb Wrong and Alan Dempsey.

Established & Sons 2009 Installation was inspired by the irregular architecture of a favela, creating a labyrinth of spaces to explore. The material used was 30 mm American Tulip Wood. The total amount was around 2000 QM. This was screwed to triangular supporting frames. The inclined walls were a logical approach to solving the problem of only having structure on one side. The wood was fixed on site with reference to a scale model.

James Dudley
Swiss +41 79 751 89 50
www.jamesdudley.co.uk
jim.dudley@gmail.com

ESTABLISHED & SONS

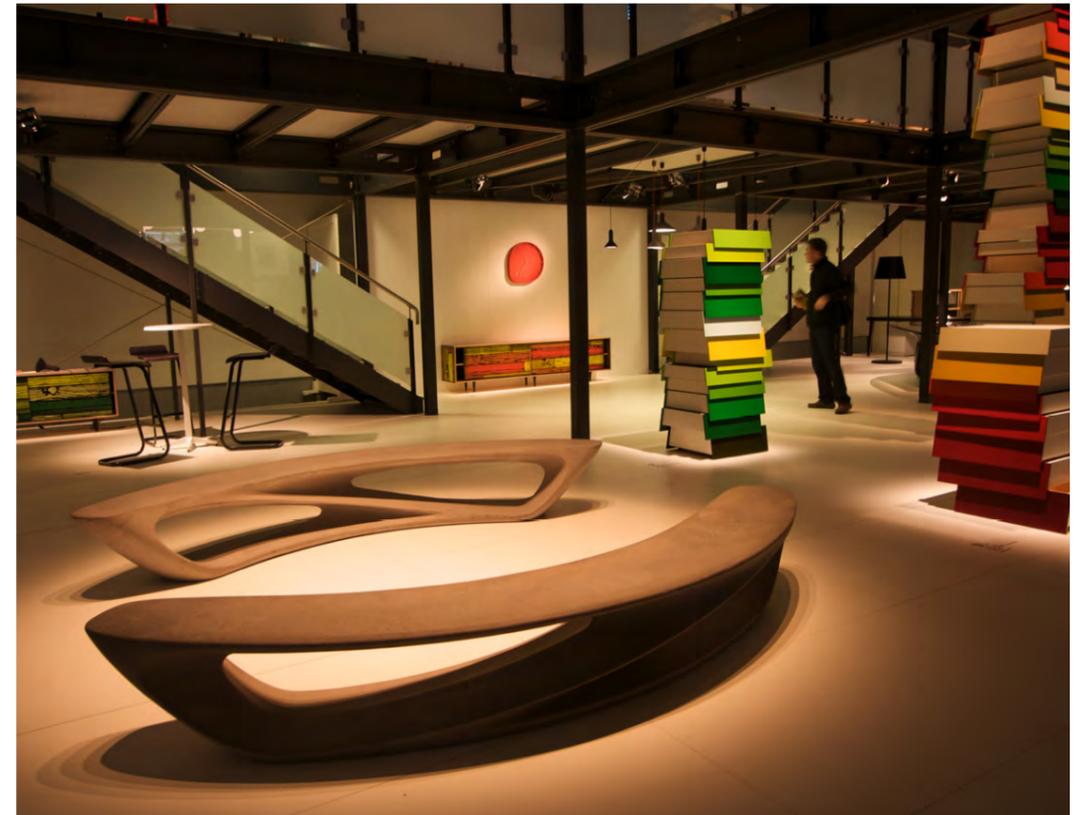

Milan Furniture Fair 2008
Designed for Andreas Messerli AG.

Our aim with this project was to create a neutral architectural canvas which would act as a platform for the many richly contrasting design languages and exciting use of colour, form and scale that have become the hallmark of the Established & Sons brand.

Working within the Pelota hall in Milan we essentially created a house within a house, albeit on a large scale. The structure, which is 25m long, 6m high, 10m deep, open-plan, semi-transparent is of a breathtaking scale but in complete sympathy with the proportions of the building that contains it. The project is entitled 4, because of its cubic design and also in recognition of the company's fourth consecutive year in Milan.

As always we sought to reduce the visual noise of the structure in order to focus on the real stars of the project, the furniture. We worked with a standard Andreas Messerli double deck steel structure, reduced to the bare elements and painted in dark grey. All flooring, walling and ceiling elements are from white panels. This created a clear and concisely articulated language of two elements, the grey structure and the white panels.

ESTABLISHED & SONS

Milan Furniture Fair 2007
Designed for Andreas Messerli AG.

Established and Sons are a London based design and Manufacturing company who have created in a short time a powerful identity closely connected to a specific graphic style. We choose to build an architecture from cardboard boxes, with each box individually printed using our flat bed print technology. This was a low cost solution to give identity to the space as well as to create "rooms" for furniture to exhibited in their key show in Milan.

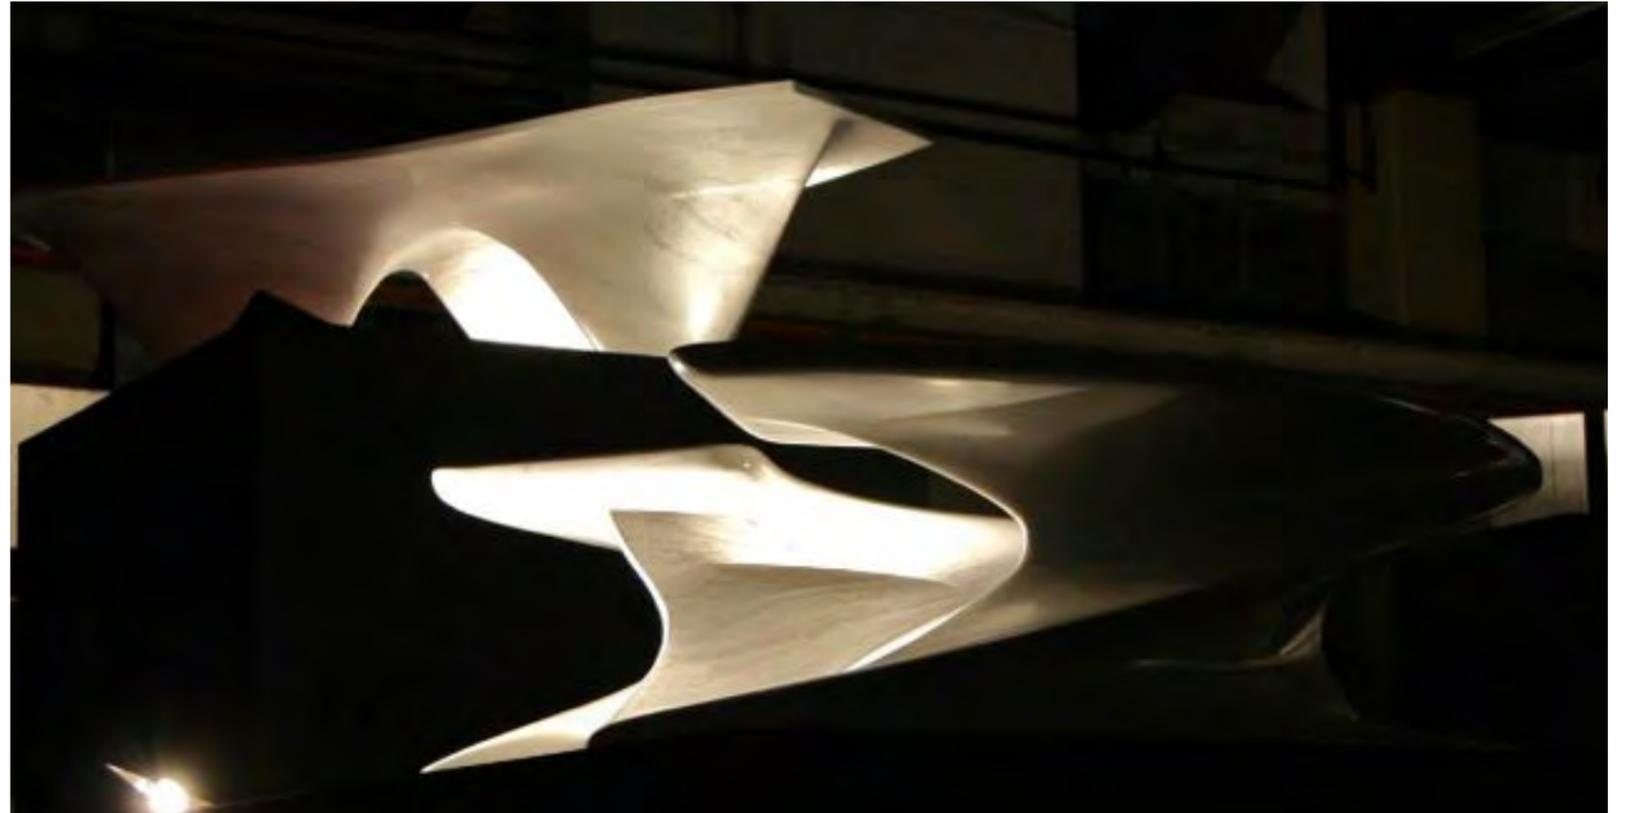

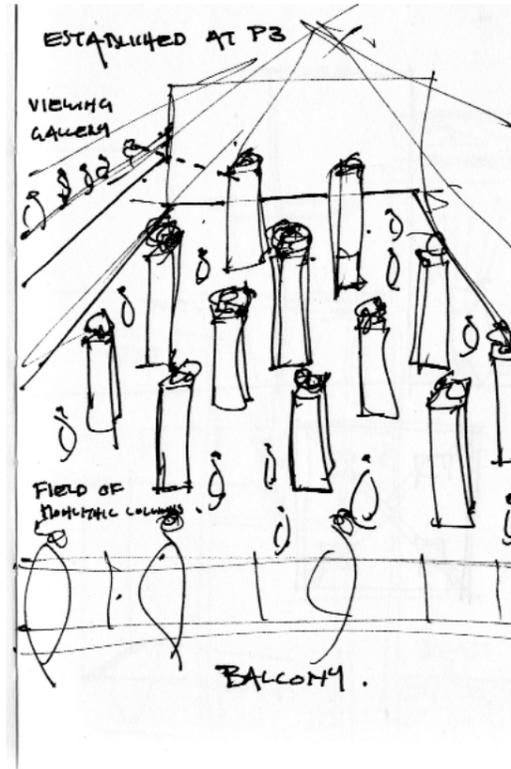

James Dudley
Swiss +41 79 751 89 50
www.jamesdudley.co.uk
jim.dudley@gmail.com

ESTABLISHED & SONS

P3, London Design Festival F2007
Designed for Andreas Messerli AG.

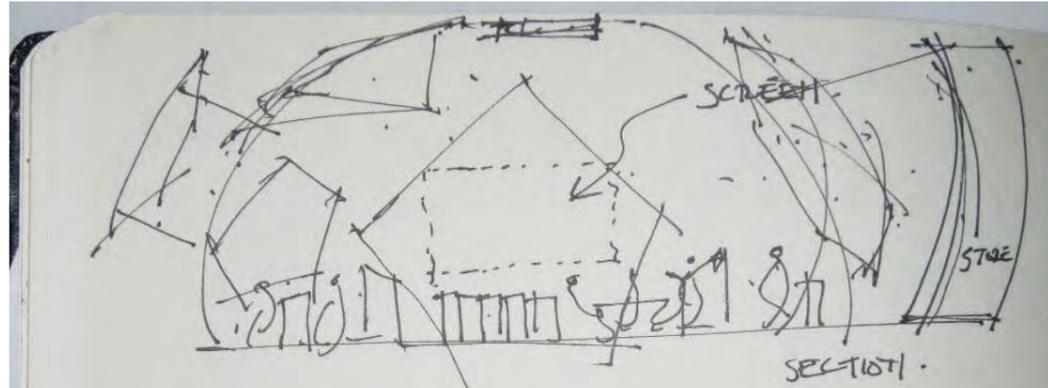

This project was developed through a close working relationship with the team at Established and Sons. The desire was to create an exhibition that provoked a debate on the nature of Design Art pieces, typically limited edition furniture pieces which command very high prices and blur the line between art and product. The manifestation of this desire was a series of twelve monument plinths upon which sat twelve iconic pieces, which as special one-offs had been carved in marble.

QATAR BID 2022

Soccerex, South Africa 2009
Designed for Andreas Messerli AG.

The design for the Qatar World Cup Bid 2022 had as its inspiration the swoosh of Pentagons that made up part of the brand identity. The bold and dynamic structure was placed onto a floor printed with a traditional mosaic design, representing the traditional values underpinning Qatari life. In addition to the eye catching structure a special touch screen table and multi screen video was developed as part of the communication package.

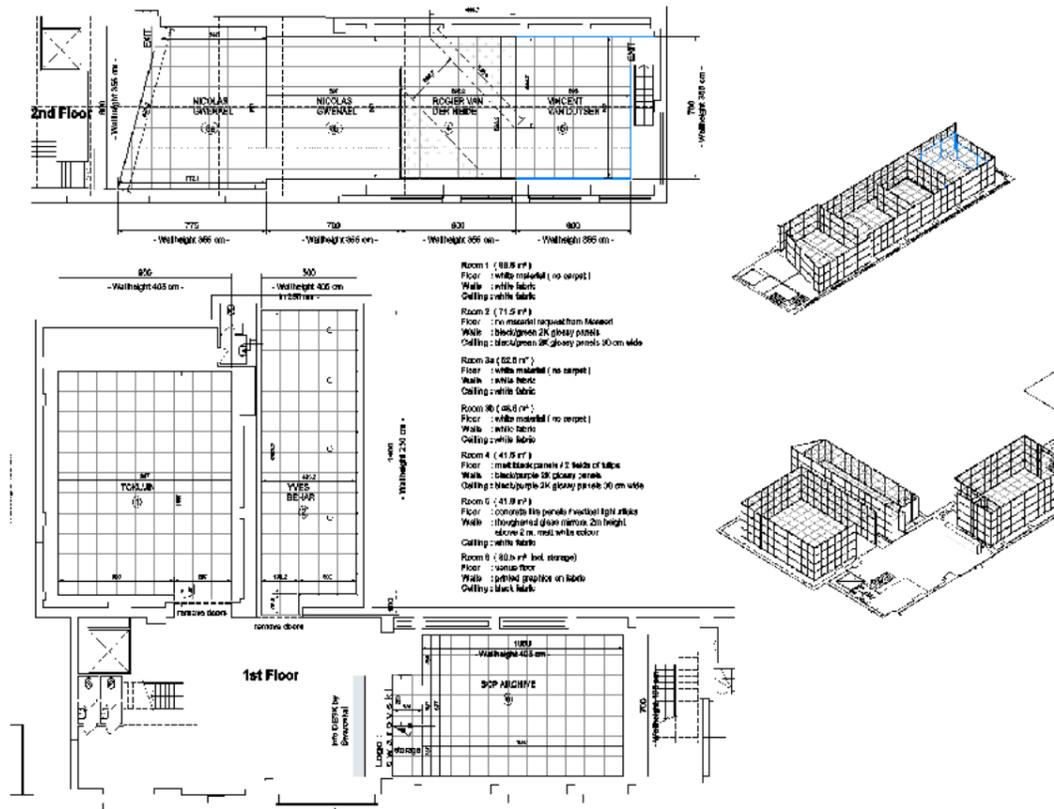

The Design for the Stand in South Africa was subsequently adapted for use in Manchester (far left). The structure was also reused as a retail environment (left).

MAMMUT

Mummut 2010
 Design for ISPO and Outdoor Exhibitions
 Designed for Andreas Messerli AG.

The design for the Mammut stand focused on the key graphics showing the mountain landscapes, usually with climbers wearing Mammut products in the iconic Mammut red. These key visual elements were enlarged as big as the stand regulations would allow to create the visual context for the brand. Black was used as the background colour with the products which were very colourful being picked out by lighting, thus creating a vibrant display. Key branding was delivered by oversized 3D cut out lettering and the subtle use of black matt on black gloss logo printing.
